Lincoln County, SD

Rainbow Arch Bridge
Redfield, SD

Steel Girder Bridge
Hudson, SD

Proven Expertise

- Over 1,000 inspections on in-service bridges
- Annual inspections
- Emergency inspections
- Staff certified and experienced with varied structures

Your Priorities

Bridge inspection and maintenance is a vital and important step to carefully maintaining infrastructure safety. With construction costs rising every year, it is important to prioritize which structures should be improved based on safety, repair cost, and cost of replacement. With inspection reports bridge owners are better able to make these determinations and prepare for budgetary needs in the coming years.

Our Experience

With experience of over 1,000 inspections of in-service bridges, Clark brings many years of specialized expertise in the evaluation of these structures. We monitor and document areas of concern on your structure over time and, with regular service and maintenance, you will be able to extend and maximize the life of your bridge.

Meeting Your Needs

When it comes to the safety and reliability of a community's infrastructure, Clark has the knowledge and expertise necessary to provide efficient, accurate, and cost-effective inspection services. Clark can help you create a maintenance program that can extend the usable life and safety of structures.
